

 YKK Snap Fasteners America Inc.

Apparel

YKK Snap Fasteners America Inc.

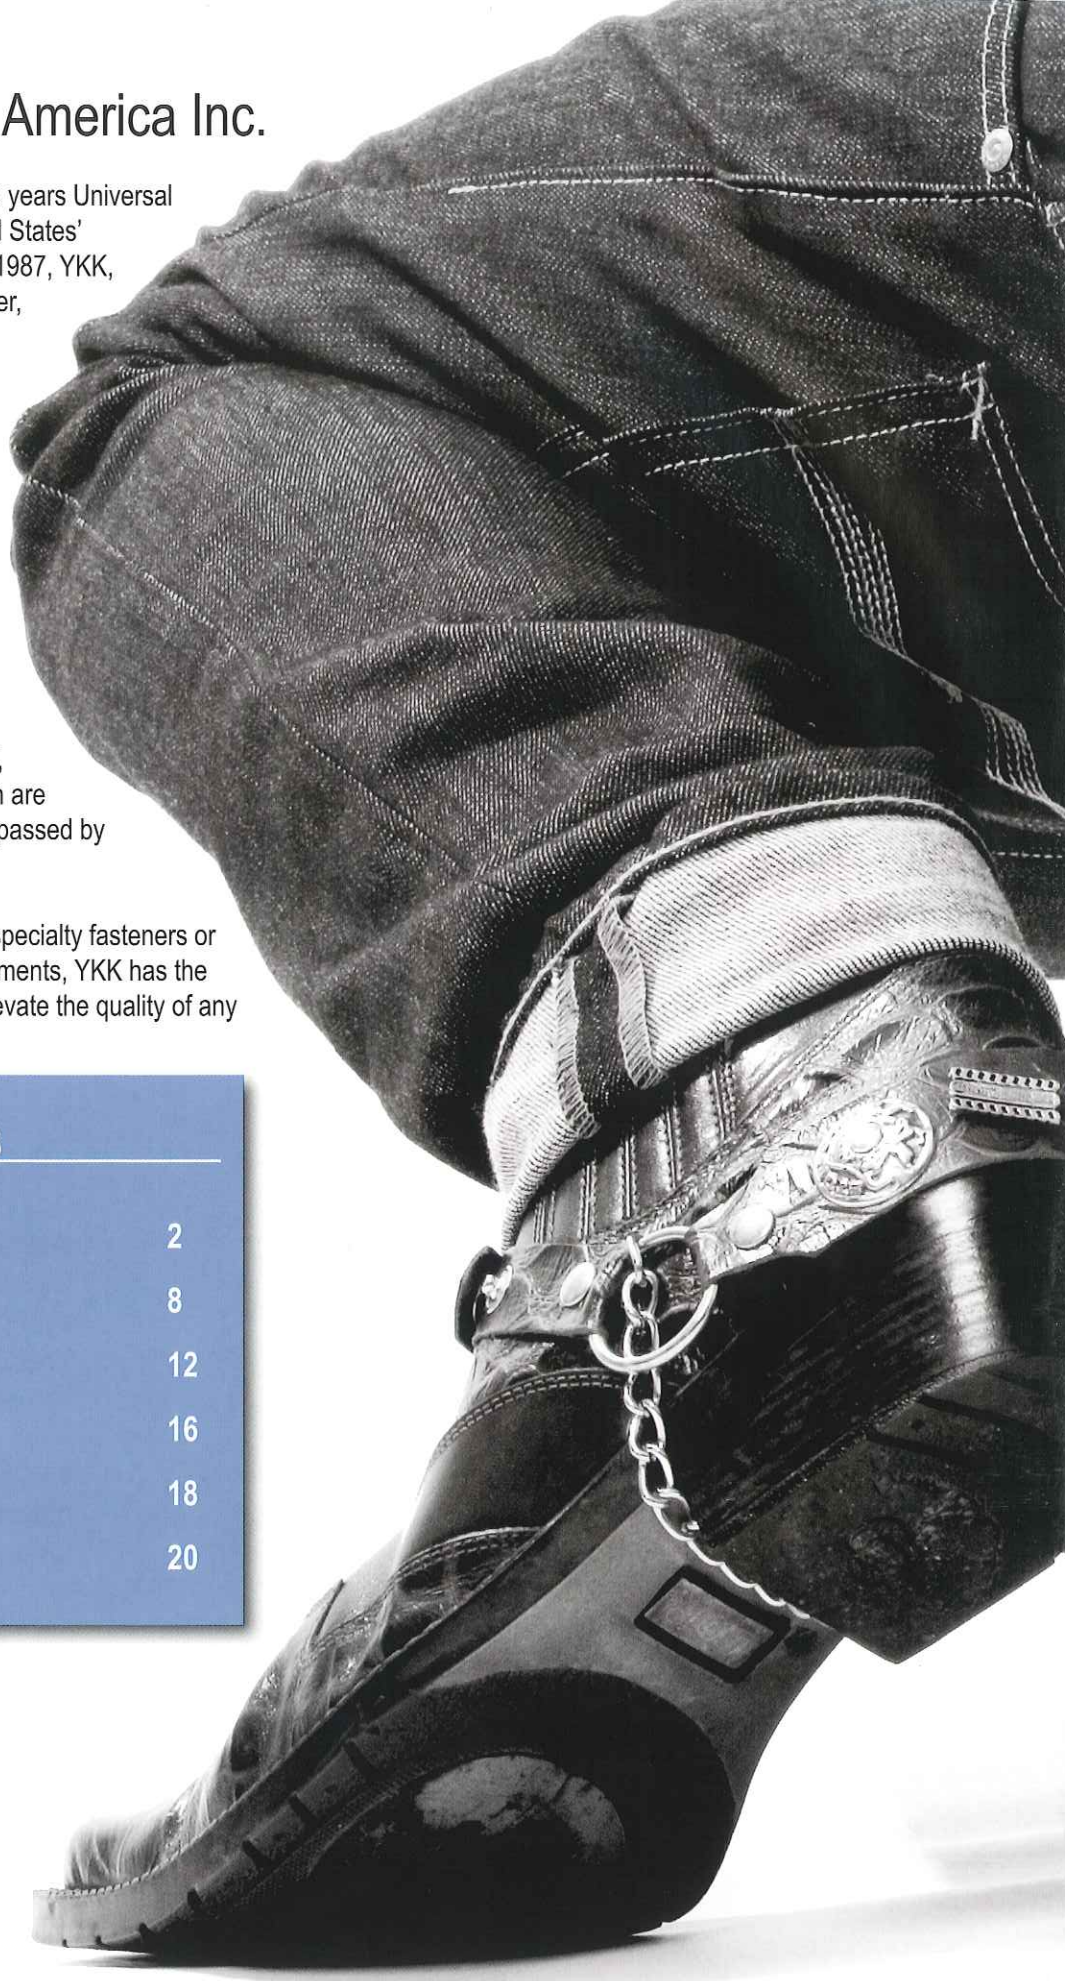

Founded in 1895, for more than a hundred years Universal Fasteners was a cornerstone of the United States' apparel fasteners manufacturing base. In 1987, YKK, the world's foremost fastening manufacturer, joined forces with us to create an even stronger company. Today's result is YKK Snap Fasteners America Inc. (YKK Snap Fasteners). Our manufacturing capacity has doubled, and we've undergone expansions in all technology and service areas.

As a member of the global YKK Snap and Button Group, our association with sister companies around the world has created the largest network of fastener and trim manufacturers anywhere. At YKK, service, quality, technology, and innovation are key to maintaining a level of service unsurpassed by anyone.

Whether you are looking for high-fashion specialty fasteners or an innovative way to ensure quality attachments, YKK has the experience, products and equipment to elevate the quality of any application.

YKK Snap Fasteners America, Inc.
Founded in 1952, for more than a hundred years, YKK Snap
Fasteners was a cornerstone of the United States
textile industry manufacturing more than 100 million YKK
fasteners for the clothing and footwear industry.
YKK Snap Fasteners America, Inc. (YKK Snap
Fasteners) is the world's largest and most
reputable manufacturer of all types of buttons
and fasteners.

As a member of the global YKK Group,
YKK Snap Fasteners is associated with
other companies around the world that
provide the largest network of fastener
and fastener manufacturers. At YKK
we have quality, technology, and innovation
that is recognized as a level of service unmatched by
any other.

Whether you are looking for high-fashion specialty
fasteners or a more durable, utilitarian
fastener, our products and equipment ensure fast
and reliable fastening.

Buttons Ap

Whether you require a high fashion button design or a utilitarian, hard working, long lasting button, it's all one and the same with YKK Snap Fasteners. We have the types and styles that fit all your requirements.

YKK Snap Fasteners manufactures three basic types of buttons: Metal Collet, Swivel Collet, and Nylon Collet.

Our basic button line is offered in combinations of nylon, steel, stainless steel, brass, and other alloys.

Spread The Word!

YKK Snap Fasteners has ISO 9000 and ISO 14001 certified quality systems in place throughout our corporate and manufacturing operations. As part of the YKK Global Snap and Buttons Group, YKK Snap Fasteners has the strength to support your fastener needs. We are capable, ready and willing to support your requirements with quality products, fashionable designs, technically advanced attaching equipment, competitive pricing and personalized service.

Burrs

Burrs are offered in eight basic styles that are attached using a solid metal rivet. Additional styles are designed to be attached with the famous 2-Prong Fastener which can be used on a wide range of fabrics and applications. All of our burr and rivet combinations offer maximum attaching strength with high quality visual appearance. Available with personalized logo designs, they are made from a variety of metals with coordinated finishes to enhance their look and performance.

Snapet® Ap

Secure attachments with a smooth, light snap tension, Snapet® is perfect for infant and children's apparel. Snapet® is designed for maximum attaching strength on knit fabrics at a most competitive cost. Quality, security and safety are yours when you use Snapet® prong ring attached snap fasteners.

Snapet® Snap Fasteners are available in 15 and 16 ligne sizes. Each variation is available with lead-free painted prong rings or capped prong rings with special optional features by product size. YKK Snap Fasteners America offers prong rings and capped rings in more than 800 colors and paint-to-match shades. Special designs and personalized logos are available on capped prong components.

Attachments can be made using YKK Snap Fasteners' approved pneumatic footpress, electric flywheel press, fully automatic model E attaching machines, and a variety of optional Model E equipment.

Hook & Eye ^{Ap}

The #8 hook and the #85 eye are the industry standard for quality slacks, trousers and dress pants. That's because they offer a low silhouette and crush-resistant design with an increased gripping area. YKK Snap Fasteners ELITE® hooks and eyes are constructed to stay attached under the most demanding applications.

YKK Snap Fasteners ELITE® hooks and eyes are manufactured from two base metals: brass or steel. Brass base components are finished with bright nickel or black nickel plating. Steel components are usually zinc plated, or as an option, nickel plated. Both the #8 hook and #85 eye are available with standard or long legs. Either variation is designed with a low profile and crush resistant geometry.

Attaching Machines

***Pres-N-Snap®**
Hand held fastener attaching pliers for light duty assembly and field repairs.

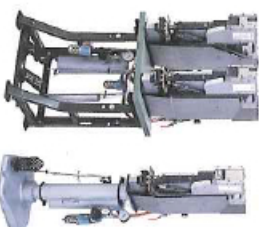

H13 Bench-top Hand Press
This tool is secured to a bench top for the assembly of fasteners in light-duty production situations or in-house repairs.

FP Series Foot Press
FP foot presses are available in the basic manual version or pneumatic style, and is used to attach hardware for low-volume production or in-house repairs. Using a 3/8" diameter shank die set, these presses are suitable to attach most hardware.

N6N
Electric powered fastener attaching machine used in low-volume production environments or for in-house repairs, the N6N is suitable to attach most fasteners and hardware using a 3/8" diameter shank die-set.

Model II Fully Automatic
The Model II machines have been the proven workhorses of the industry. As much now as when introduced, the Model II is versatile with unprecedented reliability in the attachment of snaps and associated hardware.

E7 Fully Automatic Fastener Attaching Machine
Electric-motor driven, the E7 automatically feeds and attaches a variety of fasteners and eyelets. Designed for operator comfort, the E7 functions more quietly and smoothly than traditional attaching machines.

WB200
Developed to automatically attach lightweight plastic snaps, the WB machines are compact and reliable for the attachment of all plastic snaps to a range of applications.

Semi-Auto Versa II
The Versa II can be equipped to attach one of the following: rivets & burrs, 2-Prong buttons or single tack buttons. Our new Versa II is flexible with interchangeable dies that can attach various products securely and safely.
